

This Is Orp

The world's first combination dual-tone bike horn & beacon light.

Orp was built to make you more visible by making you *hearable*. Orp combines a dual-decibel horn and front beacon light within a super-small, super-light, weatherproof and USB rechargeable package. Orp's integral strap makes mounting a breeze for almost all handlebars. All Orps come complete with the Orp Power Kit, a shim for smaller-diameter bars, and are REMORP ready.

BE HEARD

Press Orp's Wail Tail up to warn pedestrians and fellow cyclists with the **76dB friendly sound**. Press down for Orp's **96dB Loud sound** for cars and traffic. In addition, Orp's LEDs fire every time the horn is actuated, so you can be *seen and heard*.

76 dB
NICE SOUND

96 dB
LOUD SOUND

BE SEEN

Orp's two high-output Nichia LEDs deliver **70 lumens each** to make you visible. Multiple light modes give you the flexibility different conditions demand. For maximum battery efficiency use the slow strobe.

PER LED | **05** Mo
MODES

BE IN CONTROL

With REMORP, horn actuation is always under-thumb on any handlebar setup. No need to lift a hand, and horn actuation is that much faster.

TECH SPECS

Friendly sound: 76dB **Loud sound:** 96dB

LED output: 2 lights @ 70 lumens each (boost to 87 lumens), 120° cone

Battery Life: 3 hours with lights in Constant-On mode, 11 hours in Slow Strobe

ORP weight: 89 g (3.17 oz)

Handlebar Diameter: Orp stretches to fit handlebar diameters 26-33mm. A shim is included for thinner bar diameters.

Housing: Electronics are housed in a High impact polycarbonate case that is surrounded by a silicone skin making the product weather and shockproof

Orp is accident resistant
